HELLO REAL WORLD!

I am a passionate and dedicated learner that loves programming and solving complex problems. I can adapt to new technologies and ideas and I enjoy helping others understand difficult concepts. I aspire to become an outstanding Software Developer that makes key contributions in the next big thing. I obtained a bachelor degree in computer science which provided me with the base knowledge and experience in software creation and engineering. I learned about the different tools and techniques that are essential to design, create and maintain high quality and visually captivating applications.

EDUCATION

Queens College — Bachelor of Art (Computer Science)

65-30 Kissena Blvd. Flushing, NY 11367

Highlighted Courses (Technologies):

Introduction to Internet Technologies (html,css,javascript,php)

Data Structures & Algorithms (Java, OOP)

Database Systems (SQL, MySQL)

Principles of Programming Languages (Programming Paradigms, syntax, semantics)

Software Engineering (Software Development Life Cycle)

PROJECTS

Memory Card Game

This project is my favorite. At a personal level, it not only helped me improve my Problem Solving and Critical Thinking skills but also taught me the importance of Team Collaboration in Software Development.

Employee Tracker CMS

This project introduced me to back end development technologies. I became more proficient with node, I learned about type safety development with TypeScript and I learned how to interact with the database to perform crud operations.

TECH SKILLS

HTML

CSS

JavaScript

TypeScript

React.js

TailwindCSS

Git/GitHub

Node.js

PostgreSQL
